HydroCision®
The Leader in HydroSurgery®

Efficient

- Simultaneously cuts and aspirates nucleus reducing procedural time
- Power driven controlled nucleus removal
- Sterile, disposable access set and handpieces for faster set-up, eliminating the need to clean, inspect and sterilize before each procedure

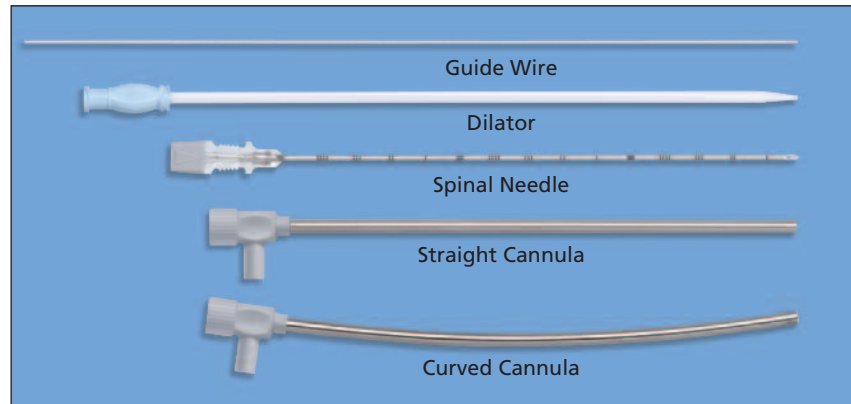

Safe

- Cool, fluid based cutting action eliminates risk of thermal tissue damage
- Round atraumatic PercResector tip design reduces risks of annular puncture and endplate damage
- One step seamless insertion of dilator and cannula ensures atraumatic, smooth entry into the disc space dilating, rather than cutting, annular fibers

Effective

- Removes precise, predictable amount of nucleus to decompress the nerve root
- Ablates tissue efficiently regardless of patient's age and disc hydration
- Small dilated annulotomy reduces risk of reherniation

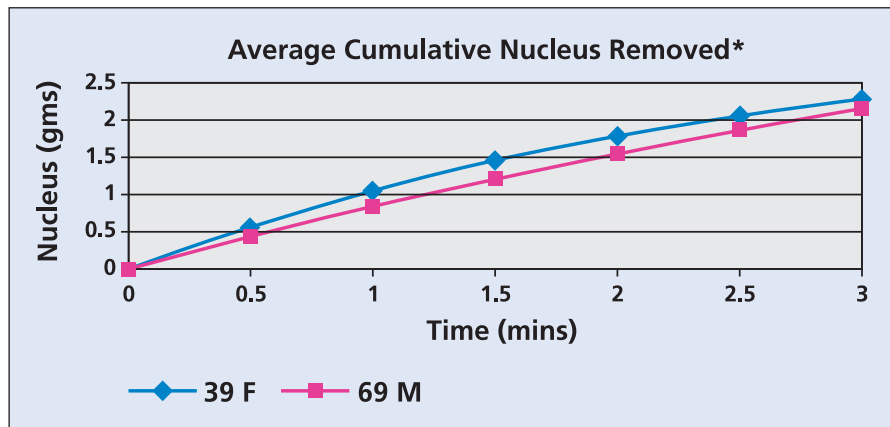

The HydroCision Percutaneous Hydrodiscectomy System includes both a straight and a curved access cannula.

Ordering Information

SpineJet Percutaneous HydroDiscectomy System

Description	Catalog No.
<ul style="list-style-type: none"> • SpineJet PercResector Handpiece and Direct Connect Tubing Set • SpineJet Percutaneous Straight and Curved Access Set Options <i>(Includes one access set which can be configured as straight or curved.
